1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John Grover on 16 January 2007. Applicant agreed to put the original text of claim 4 into claim 1, as this more clearly sets forth the subject matter. Further, a typographical error in claim 15 is corrected.

The application has been amended as follows:

Claim 1 has been amended as follows:

1. A method of managing power consumption in a pulse oximeter, the method comprising:

operating a pulse oximeter at a first approximate power consumption during a first signal condition representative of a condition of a signal received from a sensor capable of detecting energy attenuated by tissue of a measurement site of a patient;

determining a second signal condition of the signal; and

operating the pulse oximeter at a second approximate power consumption different than the first approximate power consumption based on the second signal condition, wherein the steps step of operating the pulse oximeter at the first approximate power consumption comprises generating a drive signal for the sensor at a first duty cycle, and of wherein the step of operating the pulse oximeter at the second approximate power consumption comprises varying generating the drive signal for the
